

L'HOSPITALET

SMART CITIES — HUMAN FUTURES

Cities are more than parks and buildings; they are opportunities, destinations, stories and identities. Spaces in which we live, create and grow. They are home to many. We believe that building a city is something to be done all together and this is why L'Hospitalet is being designed between all of us, understanding the needs of big and small, young and not so young.

We leave no one behind in a city that works towards social, environmental and economic sustainability, because we are part of the 2030 Agenda and the 17 Sustainable Development Goals. This is a perfect opportunity to find a common language that allows to build alliances and synergies, as well as to identify priority areas of action for sustainable and inclusive local development. We are willing to become a smarter city with a people-centered future.
